

SUMMER COURSE

The Role of Youth in The Forest and Environmental Management to Achieve Sustainable Development Goals

31 October - 15 November 2020

@ Zoom Cloud Meeting

INTRODUCTION

The sustainability of forest functions is influential and crucial for obtaining several of the 17 Sustainable Development Goals (SDGs). Through collaboration with AFSA (Asean Forestry Students Association) which was established in 1993 in Bogor, the Faculty of Forestry and Environment provides opportunities and encouraging the youth to contribute actively to sustainable forest management and the achievement of SDGs. This summer course aims to extend the role and knowledge of youth in forest management and policy, the relation of forests and climate change, leadership management, the concept and implementation of SDGs. The experience of interacting with scientists, professional practitioners, and the local community is added value for this summer course.
